

Détecteur de mensonges

Solution à rédiger en allemand, anglais, italien ou espagnol.

On planet MB 52 there are only two tribes : on tribe that is always telling the truth and one tribe who is always lying.

A space traveller is looking for a guide among those who are always telling the truth in order to visit the MB 52.

He asks the first inhabitant he meets:

"Which tribe do you belong to?"

Of course, the man answers :

"I am always telling the truth."

In doubt the traveller sends him to ask another native which tribe he belongs to.

The first inhabitant comes back and tells the traveller :
"He told me he is always saying the truth."

Can the traveller take the first inhabitant met on planet MB 52 as a guide or not ? Explain your answer.
