Epreuve 9 : Faut pas pousser

At the bottom of the sea Poseidon finds an amphora engraved with the letters: XUPIRBHYH.
He is puzzled and goes to see Athena, the goddess of knowledge, who gave him some clues:

"To decode each letter of the message you must:

-give each letter its number in the alphabet (1 for A, 2 for B, etc);

-multiply the number by 3;

-add 7 to that result;

-divide this new answer by 26;

The remainder that you get indicates the letter (A for 1, B for 2, etc)"

Decode the inscription engraved on the amphora.
