

Test 4 : Don't joke, Manu !

Erwan finds that he cannot open the security chain on his school locker. He immediately thinks that his friend Manu is playing a practical joke.

At the same second he gets a text message:

I've changed your code

The new code is between 400 and 600

It's a multiple of 9

The digit in the 10s column is 5.

After thinking for a bit Erwan realises there are just three possible codes that will open the chain.

Write down the 3 codes
