

**Test 5 : The Maze**

Blackbeard has cut the treasure-map of his island into 9 pieces in order to protect the treasure. Robin has found all the pieces (see the annex sheet) and wants to put the map together again to see how to steal the treasure.

He knows that :

- The map is a square
- It shows an island
- The treasure is at the centre of the map

**Stick the map back together and show the location of the treasure.**
