

Question 4 : Mathwork

Emilie's little baby girl is just 18 months old. Emilie has collected some pieces of material to make a quilt cover.

She has pieces of red, blue and violet.

She cuts the material into squares of two different sizes.

Here is a diagram of how she has started her cover :-

Stick to these rules :

- two squares that are touching cannot be the same colour except if they are touching only at a corner ;
- there are no gaps or holes and there is no overlapping ;
- she uses 18 pieces of material in total.

Cut out and stick these squares on the diagram to complete Emilie's model.
