

**Question 6 : Halloween**

An enchanted village is home to fairies, witches and elves. Each magical creature lives on their own in their house. At Halloween Arthur knocks on the doors :

- if a fairy opens it she gives him 3 sweets ;
- if a witch opens the door she takes a sweet from him ;
- the elves never open the door.

When he gets back home Arthur gives each creatures house a colour and says :

After knocking the doors of these 5 houses I had gained 8 sweets.

After knocking at these 5 houses I had neither gained nor lost sweets.

**Write the word fairy, witch and elf under each house in the legend below.**
