

Correction succincte

Il y a au moins 3 solutions.

Annexe :

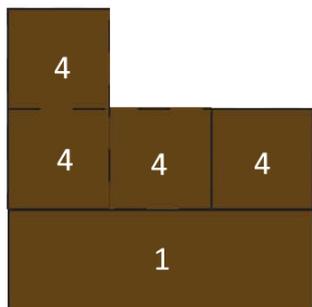

Solutions :

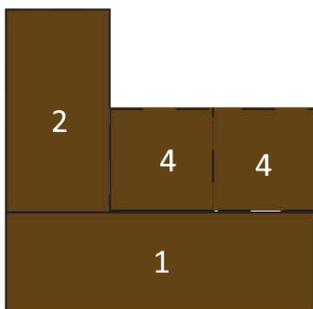

5 parts de la 4^{ème} tablette et la part de la 2^{ème}.

$$5 \times \frac{1}{6} + \frac{1}{3} = \frac{5}{6} + \frac{2}{6} = \frac{7}{6}$$

4 parts de la 4^{ème} tablette et la part de la 1^{ère}.

$$4 \times \frac{1}{6} + \frac{1}{2} = \frac{4}{6} + \frac{3}{6} = \frac{7}{6}$$

2 parts de la 4^{ème} tablette, la part de la 2^{ème} et la part de la 1^{ère}.

$$2 \times \frac{1}{6} + \frac{1}{3} + \frac{1}{2} = \frac{2}{6} + \frac{2}{6} + \frac{3}{6} = \frac{7}{6}$$
