Epreuve 7 : Patron, l'addition !

There are 12 triangles on the net of the pyramid you have been given.
You are to put a number in each empty triangle using the numbers 1 to 5 twice (the two 5s are shown already).
When the pyramid is constructed each triangle will be touching 3 others. The sum of the numbers in these 3 triangles must always equal 10.

Stick the completed net on your answer sheet.
